

**"Portola  
Systems  
understands  
our unique  
dual  
need...  
They  
listened,  
and our  
system  
works!"**

“Portola Systems understands our unique dual need — to provide computer access to our members with internet access,

homework help and video/music editing

capabilities, while maintaining the security of our administration functions such as financial data and member management records.

Portola designed for us an up-to-date LAN that functions as a secure administrative tool and a valued resource. They listened, and our system works!”
